HCL BigFix

Secure Every Endpoint Against the Worst Threats: Now and Anywhere

HCL BigFix

Overview

With HCL BigFix, IT Security and Operations teams can collaborate more effectively to reduce security risks and operational costs, compress endpoint management cycles, optimize endpoint-related processes, automate repetitive tasks, and enforce continuous compliance. BigFix also empowers IT Operations to assess and remediate known critical vulnerabilities to proactively fight against cyber attacks.

BigFix can Secure Every Endpoint Against the Worst Threats: Now from Anywhere.

Benefits

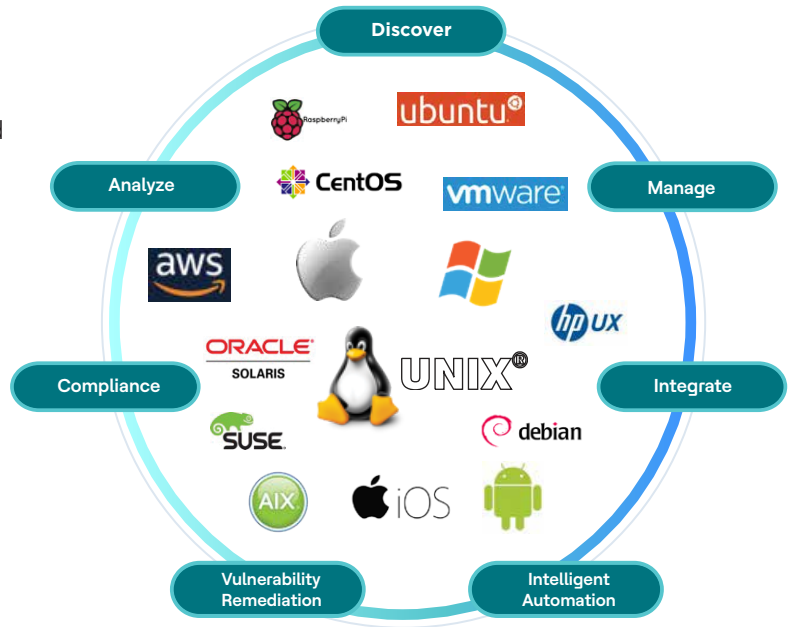

- ◆ **Automation:** BigFix Fixlets™ automates many routine and daily operations tasks. More than 500,000 out-of-the-box Fixlets are available and the BigFix team is continuously updating the library with over 130 content updates per month, available on BigFix.me.
- ◆ **Continuous Compliance:** BigFix continuously enforces patch and configuration compliance using thousands of out-of-the-box security checks in alignment with industry standard security benchmarks published by CIS, DISA STIG, USGCB and PCI-DSS.
- ◆ **Tool Consolidation:** IT organizations can optimize resources and consolidate tools using a single management platform to secure and manage all endpoints. BigFix supports nearly 100 different operating systems and variants. By consolidating tools, BigFix slashes IT costs, reduces security and operational complexity, and optimizes IT staff.
- ◆ **Vulnerability Remediation:** BigFix helps IT Ops get ahead of cyberattacks by providing the ability to visualize threats across the endpoint landscape, then prioritize remediations, and take action immediately to mitigate threats. BigFix leverages threat information from MITRE, CISA and scans from Tenable and Qualys.

- ◆ **Process Optimization:** By streamlining and standardizing endpoint management processes, BigFix customers can manage their fleet of endpoints with 70-80% less effort. First pass patch success rates of > 97% reduces dramatically remediation time and efforts.

- ◆ **Complete Visibility and Control:** BigFix is a single endpoint management platform providing complete visibility and control of all endpoints running Windows, Linux, UNIX, macOS, iOS, iPadOS and Android from one user interface, simplifying endpoint management and reporting.

Key Capabilities

- ◆ BigFix supports over 100 operating systems and applications to reduce tools, complexity, cost and risk across Data Center and Enduser Computing endpoints.
- ◆ BigFix's out-of-the-box, streaming content includes more prebuilt/tested/maintained patches, security controls and checklists than all of our competitors combined. Customers routinely describe others as incomplete piles of climbing gear, whereas BigFix just gets you to the top of the mountain.
- ◆ BigFix's intelligent automation for Tenable and Qualys enables IT to correlate the most critical CVEs with the latest, superseded patches, to immediately and accurately remediate vulnerabilities vs continually exchange error-prone spreadsheets between IT and Security.
- ◆ BigFix Compliance enables IT to establish baseline configurations to ensure continuous compliance with Operational, Security and Regulatory policies including PCI, CIS, NIST, DISA STIG, NIS2, CISA KEV, etc. plus immediately remediate configuration drift. Using BigFix, IT and Security are more aligned than ever, with the ability to simulate the impact of vulnerability remediation using the absolute minimum number of patches, create and manage Protection Level Agreements (PLAs), operationalize Zero Trust initiatives and address CISA Known Exploited Vulnerabilities (KEV) quickly.

About HCLSoftware

HCLSoftware is a division of HCL Tech (HCL) that operates its primary software business. It develops, markets, sells, and supports over 30 product families in the areas of Digital Transformation, Data Analytics & Insights, AI and Automation, and Enterprise Security. HCLSoftware has offices and labs around the world to serve thousands of customers. Its mission is to drive ultimate customer success with their IT investments through relentless innovation of its products. Visit www.hclfederal.com to learn more.
