Fast • Accurate • Agile
Application Security Testing

Overview

Dependable Application Security Testing with HCL AppScan

Organizations that operate on the web need to secure their applications from potentially costly data breaches that can severely impact their business, employees, and customers. HCL AppScan enables developers, DevOps, and security teams to write more secure code faster, automate vulnerability scanning throughout the software development lifecycle, and collaborate to ensure that issues are found and fixed before applications are deployed.

About HCL AppScan

HCL AppScan is a suite of application security testing platforms, technologies, and services that help organizations detect and remediate vulnerabilities throughout the software development lifecycle (SDLC). Powerful static, dynamic, interactive, and open-source scanning engines (DAST, SAST, IAST, SCA, API) quickly and accurately test code, web applications, APIs, mobile applications, containers, and open-source components with the help of machine learning capabilities. Centralized dashboards provide visibility, oversight, compliance policies, and reporting. HCL AppScan's scanning engines are maintained by expert security researchers and are continuously updated to remain current with recent technologies, vulnerabilities, and attack vectors.

◆ **Secure DevOps**

Enable effective scanning technology for Secure DevOps with beautifully designed and simple-to-use tools and dashboards.

◆ **Enterprise Management**

Improve governance with enterprise-level control, visibility, scalability, and performance.

◆ **Focus on the Fix**

Reduce overall remediation time with self-correlating findings, targeted guidance, and developer-assisted services.

The HCL AppScan Suite Includes

HCL AppScan Standard is a dynamic application security testing (DAST) desktop tool designed for security experts and pen-testers alike. Using a powerful scanning engine, AppScan automatically crawls the target application and tests for vulnerabilities.

HCL AppScan Source is an on-premises static application security testing (SAST) tool. It helps organizations test applications and APIs for potential vulnerabilities earlier in the development process. Customers who adopted a shift-left security approach and created secure development frameworks with AppScan significantly reduced remediation costs and risks.

HCL AppScan Enterprise is a scalable application security testing tool offering SAST, DAST, IAST and risk-management capabilities, to help enterprises manage risk and compliance. AppScan enables security and development teams to collaborate, establish policies, and perform testing throughout the application development lifecycle.

HCL AppScan on Cloud (ASoC) is a comprehensive suite of application security testing software available as a service, including SAST, DAST, IAST, SCA, API testing, and container scanning. Customers can leverage this flexible, scalable cloud-based solution to start scanning their applications without installing any software or infrastructure.

HCL AppScan CodeSweep is a free to use security tool, designed for beginners and professionals alike, who need a quick, simple, and platform-friendly program.

CodeSweep Offers

• HCL AppScan's SAST scanning engine
• Secure as you code with our new AutoFix feature
• Support for over 30+ languages/frameworks
• Easy integration with AppScan on Cloud
• On-the-fly security testing

Get Secure DevOps with HCLSoftware

Interested in implementing DevSecOps to enable enterprise level security? HCLSoftware offers an extensive suite of DevOps solutions that complements HCL AppScan and enables businesses to transition into a complete DevSecOps solution.

About HCLSoftware

HCLSoftware is a division of HCLTech (HCL) that operates its primary software business. It develops, markets, sells, and supports over 30 product families in the areas of Digital Transformation, Data Analytics & Insights, AI and Automation, and Enterprise Security. HCLSoftware has offices and labs around the world to serve thousands of customers. Its mission is to drive ultimate customer success with their IT investments through relentless innovation of its products.
