HCL Domino

## Create Better Looking Apps — in Minutes

Restyle existing apps with a more modern look and UI. Apply new themes or update colors — update one application or multiple apps all at once.

## Eliminate Double-booked Meetings

View calendar availability in mixed environments, including Domino, Office 365 and Exchange, to schedule meetings that don't overlap.

## Prevent Inbound and Outbound Email Threats

Reduce threats with your chosen virus scanning service — plus ensure emails are not altered in transit using the latest industry standards.

## Simplify Deployment with Domino One-touch Setup

Create a new Domino server with a single command that loads your certificates, registers users, and completes the install in minutes.

# HCL Domino

## Empower your Employees. Accelerate Innovation. Streamline work.

Key Business Features	Benefits
Modernize the look, feel, and user interface for existing apps.	Restyle existing apps in minutes – easily update one application or multiple apps all at once.
Add handwritten “signature” to forms, with rich text support, to enable approval workflows.	Automate and accelerate workflows by enabling rich text field to add handwritten “signature” to your forms – approve on your device in Notes and Nomad Web.
Save time and reduce over-booked meetings.	Easily determine when colleagues are free to meet even if they are using Domino, Exchange, and Office 365-based calendars.
Citizen developers can build more sophisticated workflows using HCL Domino Leap with integration to Domino.	<ul style="list-style-type: none"><li>• Empower business users to build no-code apps without specialized IT or Domino skills.</li><li>• Business users can build apps 60-70% faster.</li><li>• Build apps that read and write to Domino Rich Text fields.</li></ul>
Expand calendar delegation capabilities to create meetings on behalf of another mail file owner.	Empower authorized delegate to manage another user’s calendar to create calendar events and centralize appointment booking with DOMI.
Save time and stay organized with OnTime Group Calendar for Domino*	OnTime delivers a core set of group calendar functionality to bring transparency, effectiveness to your organization as the perfect addition for your Notes Desktop and Verse email client.

\*OnTime is an IntraVision ApS product and a HCLSoftware partner.

Key Technical Features	Benefits
Maintain a virus-free environment with stronger email security.	Reduce endpoint threats – connect your Domino server to a chosen virus scanning service using ICAP protocol.
Simplify your deployment with Nomad Web – even easier to deploy – less to manage.	Connect users directly to your Domino server to experience Nomad Web Client in the browser, without installing SafeLinX.
Reduce complexity and save time with Domino one-touch deployment.	Create new Domino server with a single command that loads your certificates, registers users – completes install in minutes.
Expand the ways corporate IT authenticates users using your Domino applications.	Increase flexibility for user authentication with support for Google, Yahoo, Microsoft AD, or any KeyCloak mechanism.
Reduce support costs – never upgrade another Notes client again.	Nomad web provides clientless Notes access on your choice of browser – upgrading Notes client no longer required.
Add contemporary REST APIs to Domino, enabling a modern programming experience.	Increase your toolset flexibility and use your pro-code tools of choice with Domino for application modernization.

Upgrade now to maximize your Domino investment!
