**Cost to Replace
HCL Domino**

Authenticate Securely Without a Password

Improve the strength of web authentication with passkeys — provide faster, easier, and more secure sign-in for websites and apps.

Modernize Your Toolset-Speed Up App Delivery

Enable better performance and far richer toolset with Java 17 and the latest Eclipse framework, reducing cost of delivering secure apps.

Easily Send Personalized Email to Multiple Recipients

Quickly dispatch emails to predefined lists of customers, employees or partners with built-in "mail merge" feature

Simplify administration with "Auto Update"

Reduce security risks and improve admin efficiency through "auto notify" and "auto download" for Domino software updates and patches.

HCL Domino

Empower Your Employees. Accelerate Innovation. Streamline Work.

Key Business Features	Benefits
Enable on-the-spot workflow approvals to forms with rich text support	Automate and accelerate workflows by enabling handwritten "signature" to your forms — approve instantly on your device in Notes and Nomad Web.
Save time and reduce over-booked meetings.	Easily determine when colleagues are free to meet even if they are using Domino, Exchange, and Office 365-based calendars.
Business users can build sophisticated workflows using HCL Domino Leap with integration to Domino.	<ul style="list-style-type: none">• Empower business users to build apps without writing a single line of code.• Business users can build apps 60-70% faster.• Build apps that read and write to Domino Rich Text fields.
Expand calendar delegation capabilities to create meetings on behalf of another mail file owner.	Empower authorized delegate to manage another user's calendar to create calendar events and centralize appointment booking with DOMI.
Save time and stay organized with OnTime Group Calendar for Domino. (Note: Paid subscription enables additional users and features above the Freemium version.)	OnTime delivers extensive group calendar functionality with representation of individual calendars to simplify meeting scheduling for your Notes and Verse email client.

Key Technical Features	Benefits
Maintain a virus-free environment with stronger email security.	Reduce endpoint threats — connect your Domino server to a chosen virus scanning service using ICAP protocol.
Simplify your deployment with Nomad Web — even easier to deploy — less to manage.	Connect users directly to your Domino server to experience Nomad Web Client in the browser, without installing SafeLinx.
Reduce complexity and save time with Domino one - touch deployment.	Create new Domino server with a single command that loads your certificates, registers users — complete install in minutes.
Expand the ways corporate IT authenticates users using your Domino applications.	Increase flexibility for user authentication with support for Google, Yahoo, Microsoft AD, or any KeyCloak mechanism.
Reduce support costs - never upgrade another Notes client again.	Nomad web provides clientless Notes access on your choice of browser — upgrading Notes client no longer required.
Add contemporary REST APIs to Domino, enabling a modern programming experience.	Increase your toolset flexibility and use your pro-code tools of choice with Domino for application modernization.
Speed up admin-intensive download tasks.	Simplify deployment with a complete software package download that includes Verse, Nomad, Domino Leap and OnTime Group Calendar — ready to configure and enable.

Upgrade now to maximize your Domino Investment!
